

Spotlight, Maribyrnong

Location **Maribyrnong, Australia**

Product **Combi-60 Fabric Duct**

Scale **328 linear metres**

Client **Spotlight**

Engineer **BRT Consulting Engineers**

Spotlight has many stores throughout Australia and has chosen FabricAir fabric duct for a number of them.

Spotlight in Maribyrnong has fabric duct installed in their retail space along with the back of house areas to supply conditioned air throughout the entire building.

NozzFlow diffusion method was selected with a lower than normal static pressure so there would be adequate air distribution with little to no draft being created. Type 8 All-In-One suspension was installed due to it being pleasing to the eye and during periods when the airflow is lowered the duct will hold it's round shape better than alternative suspension methods.
