

La Trobe University Physical Sciences Building 3

Location **Melbourne, Australia**

Product **Chilled Water Cassettes**

Scale **50 rooms**

Client **Collins & Graham Mechanical**

Engineer **LEHR Consulting International**

Builder **Kane Constructions**

The \$18 million redevelopment of the Physical Science Building will create 2380 square metres of open floor teaching spaces, two tiered lecture theatres and informal learning common areas. ACS are supplying 50 chilled water ceiling cassettes to keep students and lecturers comfortable.

The project objectives are:

- To create additional centrally-managed teaching spaces to accommodate the University's Future Ready: Strategic Plan 2013-2017 projected growth.

- To create new and modern teaching spaces that meet industry benchmark standards for space and comfort.

- To create new teaching spaces that enable the delivery of flexible learning.
